Table of Contents Volume 179, 1989

Number 1

D.S. Dennison, T.C. Vogelmann: The *Phycomyces* lens: measurement of the sporangiophore intensity profile using a fiber optic microprobe 1

E. Bednarska: Localization of calcium on the stigma surface of *Ruscus aculeatus* L. Studies using chlorotetracycline and X-ray microanalysis 11

M.J. Holdsworth, G.G. Laties: Site-specific binding of a nuclear factor to the carrot extensin gene is influenced by both ethylene and wounding 17

R. Turgeon, P.K. Hepler: Symplastic continuity between mesophyll and companion cells in minor veins of mature *Cucurbita pepo* L. leaves 24

D. Hodick, A. Sievers: On the mechanism of trap closure of Venus flytrap (*Dionaea muscipula* Ellis) 32

A.F. Croes, A.J.R. van den Berg, M. Bosveld, H. Breteler, G.J. Wullems: Thiophene accumulation in relation to morphology in roots of *Tagetes patula*. Effects of auxin and transformation by *Agrobacterium* 43

H.E Neuhaus, M. Stitt: Perturbation of photosynthesis in spinach leaf discs by low concentrations of methyl viologen. Influence of increased thylakoid energisation on ATP synthesis, electron transport, energy dissipation, light-activation of the Calvin-cycle enzymes, and control of starch and sucrose synthesis 51

M. Sauter, A. Hager: The mycorrhizal fungus *Amanita muscaria* induces chitinase activity in roots and in suspension-cultured cells of its host *Picea abies* 61

N.A. McHale, E.A. Havir, I. Zelitch: Photorespiratory toxicity in autotrophic cell cultures of a mutant of *Nicotiana sylvestris* lacking serine: glyoxylate aminotransferase activity 67

K.M. Davies, D. Grierson: Identification of cDNA clones for tomato (*Lycopersicon esculentum* Mill.) mRNAs that accumulate during fruit ripening and leaf senescence in response to ethylene 73

C.J. Chastain, R. Chollet: Interspecific variation in assimilation of $^{14}CO_2$ into C_4 acids by leaves of C_3, C_4 and C_3–C_4 intermediate *Flaveria* species near the CO_2 compensation concentration 81

D. Weiss, A.H. Halevy: Stamens and gibberellin in the regulation of corolla pigmentation and growth in *Petunia hybrida* 89

I.O. Sanders, A.R. Smith, M.A. Hall: The measurement of ethylene binding and metabolism in plant tissue 97

I.O. Sanders, A.R. Smith, M.A. Hall: Ethylene metabolism in *Pisum sativum* L. 104

H. Griffiths, B.L. Ong, P.N. Avadhani, C.J. Goh: Recycling of respiratory CO_2 during Crassulacean acid metabolism: alleviation of photoinhibition in *Pyrrosia piloselloides* 115

P. Nick, E. Schäfer: Nastic response of maize (*Zea mays* L.) coleoptiles during clinostat rotation 123

Number 2

M.E. Rumpho, F.D. Sack: Fluorescence microscopy and radiolabeling of C_3 and C_4 chloroplasts using di*iso*thiocyanatostilbene disulfonic acid as a marker for the phosphate translocator 137

S. Meiners, M. Schindler: Characterization of a connexin homologue in cultured soybean cells and diverse plant organs 148

J.A. Napier, J.M. Chapman, M. Black.: Calcium-dependent induction of novel proteins by abscisic acid in wheat aleurone tissue of different developmental stages 156

C. Digonnet-Kerhoas, G. Gay, J.C. Duplan, C. Dumas: Viability of *Cucurbita pepo* pollen: biophysical and structural data 165

U. Sonnewald, A. Sturm, M.J. Chrispeels, L. Willmitzer: Targeting and glycosylation of patatin, the major potato tuber protein in leaves of transgenic tobacco 171

M.P. Thelen, D.H. Northcote: Identification and purification of a nuclease from *Zinnia elegans* L.: a potential molecular marker for xylogenesis 181

H. Erdmann, R.J. Griesbach, R.H. Lawson, A.K. Mattoo: 1-Aminocyclopropane-1-carboxylic-acid-dependent ethylene production during re-formation of vacuoles in evacuolated protoplasts of *Petunia hybrida* 196

F. Ebrahim-Nesbat, S. Behnke, A. Kleinhofs, K. Apel: Cultivar-related differences in the distribution of cell-wall-bound thionins in compatible and incompatible interactions between barley and powdery mildew 203

T. Lange, J.E. Graebe: The partial purification and characterization of a gibberellin C-20 hydroxylase from immature *Pisum sativum* L. seeds 211

S. Zaina, A. Bertani, L. Lombardi, S. Mapelli, G. Torti: Membrane-associated binding sites for indoleacetic acid in the rice coleoptile 222

C. Brunold, M. Suter: Localization of enzymes of assimilatory sulfate reduction in pea roots 228

V. Toulon, H. Sentenac, J.-B. Thibaud, A. Soler, D. Clarkson, C. Grignon: Effect of HCO_3^- concentration in the absorption solution on the energetic coupling of H^+-cotransports in roots of *Zea mays* L. 235

K. Humbeck, S. Römer, H. Senger: Evidence for an esssential role of carotenoids in the assembly of an active photosystem II 242

A. Fischer, D. Meindl, E. Loos: Glucose excretion by the symbiotic *Chlorella* of *Spongilla fluviatilis* 251

K.M. Wright, K.J. Oparka: Uptake of Lucifer Yellow CH into plant-cell protoplasts: a quantitative assessment of fluid-phase endocytosis 257

P.J. White, J.A.C. Smith: Proton and anion transport at the tonoplast in crassulacean-acid-metabolism plants: specificity of the malate-influx system in *Kalanchoë daigremontiana* 265

A. Sievers, S. Kruse, L.-L. Kuo-Huang, M. Wendt: Statoliths and microfilaments in plant cells 275

Number 3

A.J. Thompson, I.M. Evans, D. Boulter, R.R.D. Croy, J.A. Gatehouse: Transcriptional and posttranscriptional regulation of seed storage-protein gene expression in pea (*Pisum sativum* L.) 279

H. Kubo, H. Mihara: Blue-light-induced shift of the phototropic fluence-response curve in *Pilobolus* sporangiophores 288

E.M. Shea, D.M. Gibeaut, N.C. Carpita: Structural analysis of the cell walls regenerated by carrot protoplasts 293
J.I. Medford, I.M. Sussex: Regulation of chlorophyll and Rubisco levels in embryonic cotyledons of *Phaseolus vulgaris* 309
Y.E. Dunaevsky, M.A. Belozersky: The role of cysteine proteinase and carboxypeptidase in the breakdown of storage proteins in buckwheat seeds 316
J. Gleitz, H.U. Seitz: Induction of chalcone synthase in cell suspension cultures of carrot (*Daucus carota* L. ssp. *sativus*) by ultraviolet light: evidence for two different forms of chalcone synthase 323
C. Halpin, M.J. Conder, J.M. Lord: Different routes for integral protein insertion into *Ricinus communis* protein-body and glyoxysome membranes 331
D. Grab, M. Feger, J. Ebel: An endogenous factor from soybean (*Glycine max* L.) cell cultures activates phosphorylation of a protein which is dephosphorylated in vivo in elicitor-challenged cells 340
G. Garab, F. Lajkó, L. Mustárdy, L. Márton: Respiratory control over photosynthetic electron transport in chloroplasts of higher-plant cells: evidence for chlororespiration 349
Y. Oji, Y. Otani, Y. Hosomi, N. Wakiuchi, H. Shiga: Nitrate reduction in root and shoot and exchange of reduced nitrogen between organs in two-row barley seedlings under light-dark cycles 359
K. Dalkin, D.J. Bowles: Local and systemic changes in gene expression induced in tomato plants by wounding and by elicitor treatment 367
K. Wehling, Ch. Niester, J.J. Boon, M.T.M. Willemse, R. Wiermann: *p*-Coumaric acid – a monomer in the sporopollenin skeleton 376
W.S. Adair, H. Appel: Identification of a highly conserved hydroxyproline-rich glycoprotein in the cell walls of *Chlamydomonas reinhardtii* and two other Volvocales 381
C.M. Dugas, Q. Li, I.A. Khan, E.A. Nothnagel: Lateral diffusion in the plasma membrane of maize protoplasts with implications for cell culture 387
S. Hua, S.K. Dube, N.M. Barnett, S. Kung: Polymorphism and Mendelian inheritance of photosystem II 23-kilodalton polypeptide 397
K. Zambou, C.G. Spyropoulos: D-Mannose uptake by fenugreek cotyledons 403
A.M. Jones, P. Lamerson, M.A. Venis: Comparison of Site I auxin binding and a 22-kilodalton auxin-binding protein in maize 409
H. Hirt, G. Casari, A. Barta: Cadmium-enhanced gene expression in suspension-culture cells of tobacco 414

Number 4

C.Z. Lowen, R.L. Satter: Light-promoted changes in apoplastic K^+ activity in the *Samanea saman* pulvinus, monitored with liquid membrane microelectrodes 421
H.D. Carr-Smith, C.B. Johnson, B. Thomas: Action spectrum for the effect of day extensions on flowering and apex elongation in green, light-grown wheat (*Triticum aestivum* L.) 428
M.J. Bennett, J.V. Cullimore: Glutamine synthetase isoenzymes of *Phaseolus vulgaris* L.: subunit composition in developing root nodules and plumules 433
F.-L. Chen, J.V. Cullimore: Location of two isoenzymes of NADH-dependent glutamate synthase in root nodules of *Phaseolus vulgaris* L. 441
R.B. Ferreira, D.D. Davies: Conversion of ribulose-1,5-bisphosphate carboxylase to an acidic and catalytically inactive form by extracts of osmotically stressed *Lemna minor* fronds 448
R.B. Ferreira, N.M. Shaw: Effect of osmotic stress on protein turnover in *Lemna minor* fronds 456
I.N. Saab, R.E. Sharp: Non-hydraulic signals from maize roots in drying soil: inhibition of leaf elongation but not stomatal conductance 466
H. Edelmann, P. Schopfer: Role of protein and RNA synthesis in the initiation of auxin-mediated growth in coleoptiles of *Zea mays* L. 475
H. Edelmann, R. Bergfeld, P. Schopfer: Role of cell-wall biogenesis in the initiation of auxin-mediated growth in coleoptiles of *Zea mays* L. 486
M.A. Tanchak, M.J. Chrispeels: Crosslinking of microsomal proteins identifies P-9000, a protein that is co-transported with phaseolin and phytohemagglutinin in bean cotyledons 495
A. Schulz, M.C. Alosi, D.D. Sabnis, R. Park: A phloem-specific, lectin-like protein is located in pine sieve-element plastids by immunocytochemistry 506
J. Marc, Y. Mineyuki, B.A. Palevitz: The generation and consolidation of a radial array of cortical microtubules in developing guard cells of *Allium cepa* L. 516
J. Marc, Y. Mineyuki, B.A. Palevitz: A planar microtubule-organizing zone in guard cells of *Allium*: experimental depolymerization and reassembly of microtubules 530
